SUMMARY

Cloud solution architect. Previously Unix/Linux sysadmin. I work at the intersection of technical teams and sales, lately with a focus on sovereignty requirements on cloud platforms. I like linking these two words for good but also open to other positions, especially if it means learning something I don't know yet.

EXPERIENCE

Solution Architect (pre-sales)

Orange Business · Brussels, Belgium · 2024 – Present

- Designed end-to-end solutions integrating disaster recovery, backup, managed service capabilities, and SLAs.
- First experience coordinating internal edge computing program and involved partners, early, useful, experimental, hands-on.
- Internal knowledge transfer of private & sovereign cloud concepts, product definitions and portfolio clarity across teams.

Unix/Linux System Administrator

Airbus Helicopters · Marignane, France · 2020 – 2023

- Developed an internal data collection tool for heterogeneous Unix/Linux environments.
- Designed lifecycle management at scale across a global server fleet, built for zero-day patch delivery.
- Operational run across civil and restricted IT environments.
